

Genomic Arabidopsis Resource Network

Issue 6

14th May 2001

GARNet, the Genomic Arabidopsis Resource Network is now in its second year. We have started the preparations for the second GARNet and Brassica functional genomics meeting.

The second GARNet functional genomics meeting will take place on September 27 and 28, at the University of York.

The speakers thus far invited for this meeting are:

Micro-Array:

Stacey Harmer

Ken Birnbaum

Forward and Reverse Genetics:

John C. Walker

Cathie Martin

Bioinformatics:

J. L. Riechmann

Metabolomics:

Ray Elliott

Proteomics:

Jacques Joyard

We are looking for speakers from among the users of the different GARNet services (available to date: proteomics, metabolomics, large insert library screening: GeTCID) but also from among people who have used tools and resources for functional genomics available from other places. When more speakers have been identified, they will be listed on the GARNet website. If you would like to give a presentation at the GARNet meeting, please submit the registration form, and tick 'oral presentation'.

The registration form for this meeting is now available at: <http://garnet.arabidopsis.org.uk>. Registration for this meeting is possible until 05/09/01.

We have a limited number of reduced registration fees available for PhD students, that will be handed out on a first come, first serve basis.

Please avoid disappointment, and register early for this meeting. Last year we were booked to capacity, and we had to refuse a few people.

all the best,

Karin
